

Your Tokyo Biking Tours guide Noel Curry (center)

Is it dangerous or difficult to ride a bicycle in Tokyo ? Do I have to be an expert rider?

Surprisingly not at all ! The course is very flat, our pace is slow, and biking here is a way of life even for families with several children. Tokyo drivers are extremely cautious around bikers. If you rode a bike as a kid or adult, you should be fine.

Safety on our tour is my number one focus.

Why choose us?

Being a **native English-speaking guide**, I can answer your detailed questions in English, rather than just relying on an English script.

I also think our tour is laid out better than other tours. **We go to more of the most popular places.** Compare our reviews with ANY other bike tour in Tokyo and you will see **we have the highest ratings on Trip Advisor of any bike company in Tokyo.** Also our usual group size is 3-12 riders, which is much smaller than other tours. Smaller is better.

Can children ride your bicycle tours?

Our tours are setup for anyone **aged 11 to 70+.** However, children under the age of 14 should be very experienced riding a bike and be able to ride confidently and follow safety instructions.

We do a test ride at the beginning to make sure everyone has the basic skill level to ride safely.

Our riders say "Absolutely the best way to see Tokyo is by bicycle !"

Comments from some of our past riders:

"It was the highlight of our trip to Japan!"

"Absolutely the best way to see Tokyo !"

"We saw more places in one day than you could see walking around for a week."

"With Noel leading the group, I felt very safe. It was a very easy, flat course."

"I never imagined you could ride a bike safely in Tokyo but you can !"

TripAdvisor rates us the #1 Outdoor Attraction in Eastern Tokyo !
